Please refer to sections 8.1 – 8.3 of the XtendiMax® Herbicide with VaporGrip® Technology label for directions on proper mixing. The applicator must check this website, found at www.xtendimaxapplicationrequirements.com no more than 7 days before applying XtendiMax® Herbicide with VaporGrip® Technology.

****Glyphosate products limited to a maximum use rate of 32 fl oz per acre for each application when tank-mixed with XtendiMax® Herbicide with VaporGrip® Technology.****

****REQUIRED DRIFT REDUCING ADJUVANTS (DRAs)****

Certain products CANNOT be tank mixed with XtendiMax® Herbicide with VaporGrip® Technology UNLESS those products are tank mixed with an acceptable DRA. If a product requires a DRA, it will be indicated in the individual product profile below. Click “see more details” for the list of individual DRAs acceptable for use with the applicable product.

Nozzle selection is one of the most important parameters for drift control. Not all drift reducing adjuvants are compatible with every nozzle type and pesticide/adjuvant combination. Check with the adjuvant manufacturer to ensure that the drift reducing adjuvant will work properly with the spray nozzle, spray pressure and specific spray solution. Read carefully and observe all precautions, limitations and all other information on the product label.
